

KIRBY MORGAN 37SS DIVING HELMET

The Stainless Steel Commercial Diving Helmet by Kirby Morgan

The Kirby Morgan 37SS stands out as the ideal option for divers seeking a streamlined stainless steel helmet. Boasting an all-stainless steel shell, along with a stainless steel block, helmet ring, bent tube, handle, and other essential components, it ensures durability and reliability. The SuperFlow 350 comes standard with this helmet.

Equipped with a quick-change communications module, the Kirby Morgan 37SS offers versatility with options for bare wire posts or a waterproof connector. This design facilitates straightforward and efficient maintenance of the helmet's communication system.

Key advantages of this stainless steel helmet include:

- Sturdy helmet shell and components
- No need for refinishing in case of surface scratches or gouges
- Elimination of threaded inserts for securing the port retainer to the helmet shell

STAINLESS STEEL HELMET

Rugged helmet shell and other components. No refinishing required if the surface is scratched or gouged.

AIR TRAIN

The air train diffuses incoming breathing air/gas onto the face port/lens to defog and ventilate.

EMERGENCY (EGS) VALVE

Emergency (EGS) Valve supplies backup breathing gas to the diver. This valve is an integral, built in part of the stainless steel sideblock.

SUPERFLOW 350 REGULATOR

This all metal, fully adjustable, Commercial Rated™ demand regulator provides easy breathing and excellent performance with low pressure compressors.

SMP ARE AUTHORISED DISTRIBUTORS

SMP are official distributors for Kirby Morgan products. We are also an official training center, offering technical courses on Kirby Morgan helmets and masks.
