multidirectional 4-way-stretch knitted polyester which provides superior strength and durability.

### DESCRIPTION

The Thor drysuit is built from vulcanised rubber and features vulcanised laminated polymers carried on a multidirectional 4-way-stretch knitted polyester which provides superior strength and durability.

Thor is suitable for commercial diving applications but is also an excellent option for military and rescue purposes as well as sport diving.

Northern Diver only use high grade rubber and EPDM to achieve a superior polymer mix which out-performs the competition.

Thor is built to the usual high-standards that divers expect from Northern Diver drysuits with Quality Control Management to BS EN ISO 9001:2008 ensuring that all Northern Diver products are of the highest quality and manufacturing standards.

Thor has been thoroughly tested at the Texas Institute. All Thor drysuits are CE approved and conform to the latest EEC PPE Directive regarding drysuits.

Independent tests show that the Thor drysuit is resistant to chemical and biological permeation.

### FEATURES

Thor drysuit neck/wrist seals and boots can be changed - this includes a full range of options such as lightweight swimming boots, wide-fitting boots for static commercial diver operations where additional insulation is required, and safety boots with steel toe-caps and mid-sole. There are also drysuit custom fit Neck Yoke, additional pockets, dry glove systems and convenience zip.
