Blackpool Road, Newton, Preston, Lancashire, United Kingdom PR4 3RE

The Viking HWS hot water suit is manufactured from a unique thin stretchy material called VSN which is also produced by Trelleborg. This material is very stable so that constant drying in an industrial dryer will NOT affect the size of the suit through its lifetime. The seams are latex treated on the inside for minimum leakage. The new MK2 suit features flat rubber tubing on the inside for comfort and covered with a layer of the VSN material. The onoff valve has been developed specifically for Viking and has been made for ease of use with heavy gloves. Comfortable neoprene neck collar and zip flap and front mounted pockets.

HWS suits are currently undergoing certification to EN14225-3:2005. Å
