FEATURES

Tego 2000 is based on a concentrated solution of an amphoteric surface active agent which has excellent disinfectant properties against a wide range of micro-organisms. Extensive laboratory and field tests have shown that Tego 2000 is effective against both gram-positive and gram-negative bacteria (including pathogens of Salmonella, Campylobacter and Listeria species) and yeasts.

Tego 2000 is recommended for application in all open plant cleaning processes. It should be applied after surfaces have been thoroughly cleaned and rinsed. It can be used for disinfecting floors, walls, utensils and other food preparation equipment and is suitable for use in meat and poultry processors, snack foods, dairies, beverage plants and most other types of food processing operations.

Tego 2000 is suitable for manual, soak or spray application and for fogging use.
