DESCRIPTION

Intrepid MK1 Immersion Suit:

Manufactured from 4-way stretch 5mm neoprene, it has been specifically designed to give the wearer maximum freedom of both movement and vision during the critical time of abandonment and at the same time offering excellent thermal insulation and a level of fire resistance. The close fitting design minimises the amount of unwanted air trapped in the lower part of the suit.

Intrepid MK8 Immersion Suit:

The Mk 8 suit is manufactured from a tough coated nylon in a high visibility red which gives the wearer the maximum opportunity of being located even in conditions of poor light. The Mk8 is designed to give a generous fitting, and will accommodate a wide range of different sized wearers. A generous foot size allows for donning when wearing heavy work boots.

Â

FEATURES

Intrepid MK1 Immersion Suit:

- 150cm² Retro tape
- Full face seal
- 5mm neoprene (4 way stretch)
- Large offset zip
- Tailored design
- Neoprene mitt pockets
- 5 finger gloves
- Tough rubber soles

Donning: The large offset zip makes the Mk 1 quick donning, the integral 5 finger gloves allow full dexterity during and after donning.

Hand Protection: For in water use an additional pair of thermal mitts are housed in easily accessible pockets situated on the sleeves.

Feet: The feet are protected by non-slip rubber soles which give both grip and protection.

Neoprene Hood: The hood is fitted with an effective face seal and has 150sq cm of retro reflective tape to aid survivor location.

Intrepid MK8 Immersion Suit:

- Full face seal
