DESCRIPTION

The SMP 2 Diver HP Panel provides a means of independently supplying breathing air to two divers and continuously monitors the two divers' depths to a maximum of 50m. The panel has a compact light design built into a robust Copolymer Polypropylene IP67 rated case providing protection from environmental and operational factors. The panel includes 3 HP air inlets, which are regulated down to provide one independent primary supply per diver and one common secondary supply.

Designed and manufactured in accordance to IMCA D040, HSE guidelines, BSI quality standards & CE approvals. Testing and certification in accordance with IMCA D018

FEATURES

Capacity: 2 Divers
