The Avelair range of evo air compressors use the latest rolling profile airends ensuring optimum efficiency. They are the product of vigorous testing and re-evaluation, which has resulted in one of the most dependable air compressors on the market today. All our air compressors are extensively tested before leaving the factory ensuring long term reliability and giving you peace of mind.

FEATURES

High Efficiency: High efficiency motors are used throughout the range offering less consumed power than standard motors. Latest rolling profile airend technology ensures optimum air output to energy input.

Design: The compressors have been developed for ease of maintenance and reliability. The compressors can also be serviced from the front allowing them to be positioned against a wall.

Low Noise: Extremely low noise operating levels allow positioning of compressors within the work place, even in the immediate vicinity of personnel

Manoeuvrability: The complete range of Avelair compressors have specifically designed holes for forklifts enabling ease of installation.

Low Maintenance: Careful placement of service items allow for ease of maintenance and reduction in costs

Reliability: High quality compressors suitable for all industrial and automotive applications.

Full Aftercare: Compressors are built in the UK offering a full Technical, Service and Sales backup.
